 - **Industry Packs:** Pre-built for Solar, HVAC, Roofing (differentiation)
 - **Revenue Optimization:** Focus on revenue generation vs just call handling
 - **SMS Integration:** Tighter SMS follow-up workflow
 - **Booking Workflow:** Calendar integration is strong
-

RECOMMENDATIONS FOR APEXAI

Phase 1: Foundation (Next 4 Weeks)

1. Implement dedicated phone number system
2. Add knowledge base training (website crawling)
3. Build basic CRM for lead capture
4. Generate call summaries automatically
5. Add Zapier integration for 8,000+ apps

Phase 2: Parity (Next 8 Weeks)

1. Implement lead scoring/qualification
2. Add multiple voice options (100+)
3. Build spam filtering
4. Create intelligent escalation logic
5. Add CRM integrations (Salesforce, HubSpot, Pipedrive)

Phase 3: Differentiation (Next 12 Weeks)

1. Build workflow builder (no-code automation)
2. Implement persistent memory system
3. Add sentiment analysis
4. Create mobile app (iOS/Android)
5. Integrate social media (Instagram, Facebook, WhatsApp)

Phase 4: Advanced (Next 16 Weeks)

1. Add RCS support
 2. Implement webchat
 3. Build analytics dashboard
 4. Create industry-specific templates
 5. Add predictive dialer for outbound
-

CONCLUSION

ApexAI is currently 60-70% behind competitors in feature parity. To be competitive, you must:

1. **Immediately:** Add dedicated phone number, knowledge base, CRM, call summaries
2. **Quickly:** Add voice options, spam filtering, integrations
3. **Soon:** Add workflow builder, persistent memory, sentiment analysis
4. **Eventually:** Add social media, RCS, webchat, advanced analytics

Your **unique advantage** is the outbound focus and industry packs (Solar, HVAC, Roofing). Lean into this, but you **MUST** match competitors on core features first.

Estimated effort: 6-9 months to reach feature parity. 12+ months to differentiate.
